

Revo™ Platform

Adjustable Keyboards - Solo Platforms

WORKRITE®
ERGONOMICS

For those who use the mouse positioned over the 10-key pad

Mouse-Over

The Revo Platform features a Mouse-Over design, which is appropriate for mouse intensive users who use the 10 key pad infrequently or users with limited reach.

Neutral wrist position is the key to comfort.

All palm supports are upholstered with LeatheRite™, providing the feel of soft glove leather and the durability of synthetic fiber. Its hypoallergenic, breathable micro porous structure dissipates heat in warm weather and retains it in cold weather. For superior palm support and comfort, choose our JelRite™ palm supports with a thermal reactive memory foam that minimizes pressure against the palm.

Thoughtful Features

On all platforms, our palm supports are easily removable to meet the user's unique requirements. All Ultra-Thin platforms have the Optimizer™, an integrated keyboard cord management feature, along with a built-in document holder and mouse cord retainer.

Durable Platforms

Our 1/4" Ultra-Thin phenolic minimizes the distance between the forearm and thigh, providing a greater range of ergonomic fit.

Features

- Mouse platform tilts independently and swivels 360° to position over 10 key pad, or at keyboard level in Mouse-Forward position
