

OMERO™

MA 2003 FLAT PANEL MONITOR ARM

Completing Your Workspace

Single Monitors

LCD flat panel monitors are experiencing a huge growth in popularity. Their thin, lightweight design has enabled offices to re-configure their working spaces. Better space utilization and employee ergonomic comfort are now within reach.

MA 2003 Omero flat panel monitor arms can improve space utilization and employee ergonomic comfort. Single monitors can be installed using one of seven mounting options.

Monitor arms have multiple joints that allow users to extend, retract, tilt, and rotate the monitor to the most comfortable viewing position. Pole mounted monitor arms can be height adjusted using a built-in lever.

Short arm, slatwall bracket

MA-1-J-W
Short arm, wall bracket

MA-1-J-P
Joint arm, panel bracket

Multiple Monitors

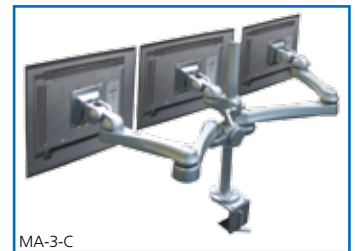

In both computer control centers and in offices, multiple monitors have emerged as an essential technology.

MA 2003 Omero flat panel monitor arms provide a solid structure for mounting multiple monitors – two, three, four, and six screen configurations.

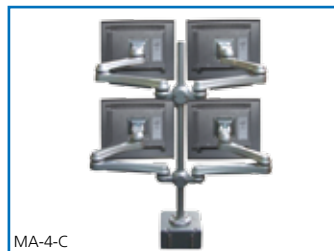

Monitor arms are made of durable die-cast aluminum alloy and steel, and are attractively finished in silver powdercoat.

Two monitor arms

MA-3-C
Three monitor arms

MA-4-C
Four monitor arms

MA-6-C
Six monitor arms

Keyboard and Monitor

In healthcare environments, computers are located close to the point-of-care.

MA 2003 Omero arms let you combine a keyboard and monitor on a pole, mounted to a wall or clamped to a desk. The keyboard flips down and folds back to save space.
