

**ViewGuard™ Anti-Glare
Frameless Privacy Filter
Installation Manual**

Thank you for purchasing a ViewGuard™ Anti-Glare Frameless Privacy Filter. ViewGuard™ offers a full range of privacy filters for notebooks, desktops, iPods, cellular phones and other mobile devices.

Please read this manual before installing your new ViewGuard™ product.

▼ **Benefits of ViewGuard™ Anti-Glare Frameless Privacy Filters**

• **Privacy Protection:** ViewGuard™ Anti-Glare Frameless Privacy Filters prevent information thieves and curious individuals from viewing your computer screen while you work in public areas including office buildings, coffee shops, airports, airplanes, train stations and restaurants. Only those directly in front of the computer will be able to view the screen when a ViewGuard™ Anti-Glare Frameless Privacy Filter is attached. Individuals viewing from an angle of 30 degrees or more will only be able to see a dark screen that will not allow the information on the screen to be read.

• **Anti-Glare Features:** ViewGuard™ Anti-Glare Frameless Privacy Filters are coated with an anti-glare technology, which significantly reduces glare caused by sunlight and fluorescent lighting. Glare is a common cause of eyestrain among computer users.

• **Screen Protection:** ViewGuard™ Anti-Glare Frameless Privacy Filters help protect the screen from damage including fingerprints and scratches. ViewGuard™ Anti-Glare Frameless Privacy Filters are easy to clean. Simply use a non-abrasive, lint-free cloth to wipe away fingerprints and debris.

• **Clear & Sharp Image Detail:** ViewGuard™ Anti-Glare Frameless Privacy Filters do not blur or distort images on your screen. With a ViewGuard™ Anti-Glare Frameless Privacy Filter attached your screen view remains clear and sharp with improved contrast and privacy without blurring.

• **Low-Profile Design:** ViewGuard™ Anti-Glare Frameless Privacy Filters were designed to maximize your privacy while having a sleek, discreet profile. The filter fits directly on your screen with attachment technology provided with your purchase.

• **Easily Attached & Removed:** ViewGuard™ Anti-Glare Frameless Privacy Filters are easily attached and removed without damage to your screen. The filter can remain in place even when you close your notebook or laptop computer. The filter fits directly on your screen with attachment technology provided with your purchase.

ViewGuard™ Anti-Glare
Frameless Privacy Filter

6 Transparent Self-Adhesive
Filter Holding Tabs

1 Cleaning Cloth

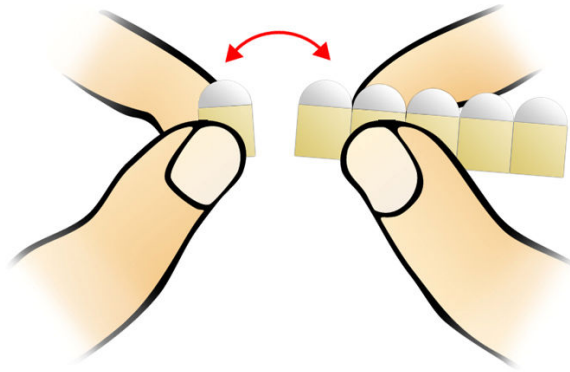

▼ Usage Recommendations

- For best results use your ViewGuard™ Anti-Glare Frameless Privacy Filter in a well-lit environment.
- If required, adjust the brightness of your display to your desired level.
- Your ViewGuard™ Anti-Glare Frameless Privacy Filter should only be used as a privacy filter for computer monitors. Please do not use it for other purposes.
- Please do not clean your ViewGuard™ Anti-Glare Frameless Privacy Filter with abrasive materials, as it may damage the special coating.
- Please do not bend or drop your ViewGuard™ Anti-Glare Frameless Privacy Filter.

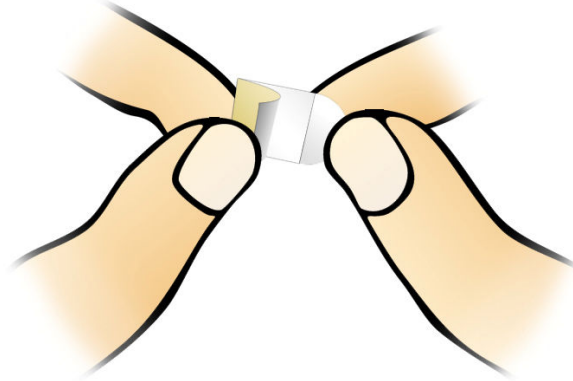

▼ Installation Instructions

1. Clean the surface of the monitor with a non-abrasive, lint-free cloth.

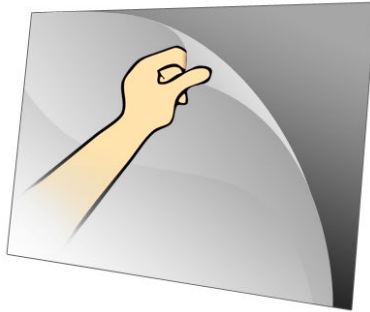

2. Separate Self-Adhesive Filter Holding Tabs.

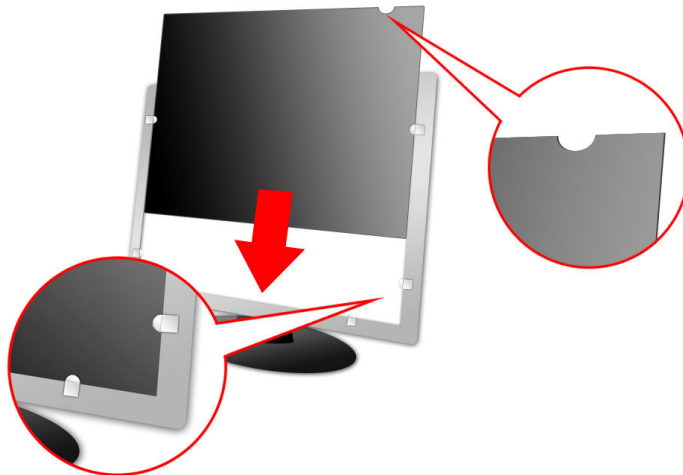

3. Remove the protective vinyl from each Holding Tab.

4. Attach each Holding Tab similar to as demonstrated in the picture above. Place two tabs on the bottom, two on the right side, and two on the left side, as shown.

5. Carefully remove the protective plastic film from the surface of the filter.

6. Insert the filter between the Holding Tabs and the screen. It is recommended that the indentation be located at the top-right corner of the screen as demonstrated in the picture above.
